Skin/Appendages: Pruritus, rarely serious skin reactions including erythema multiforme, Stevens-Johnson Syndrome and toxic epidermal necrolysis. 5 mg, amoxicillin 228 mg/5 ml, twice daily or <sup>/\*\*/</sup> <sup>/\*\*/</sup>Detailed dosage guidelines and administration information for Augmentin Oral Suspension (amoxicillin and clavulanate potassium). Shake vigorously until suspended/Decant unused suspension after 7 days When reconstituted, an off-white suspension is formed Adult Dosage: AUGMENTIN 228 BID in adults is not available and adults who have difficulty swallowing should not be given AUGMENTIN 228 BID in place of the 500-mg or 875-mg tablet of AUGMENTIN. 1 AUGMENTIN TM Amoxicillin trihydrate – Potassium clavulanate SUSPENSION 228 MG/5 ml and 457 MG/5 ml – Mixed fruit flavour. Do not give this medicine to other people even if they have the same symptoms you have, as it may not be right for them. 5 mg, amoxicillin 228 mg/5 ml, twice daily or Augmentin Amoxicillin Clavulanic acid : Tab/Susp: Short-term treatment of infections eg upper lower resp tract, ENT, skin soft tissue. Tab: S Detailed dosage guidelines and administration information for Augmentin Oral Suspension thus, use of the 125 mg/5 ml, oral suspension is recommended. In particular, it has a good activity against the clinically important plasmid-mediated  $\beta$ -lactamases frequently responsible for transferred drug resistance. If AMK is prescribed concomitantly with an aminoglycoside, the antibiotics should not be mixed in the syringe. IV fluid container or giving set because loss of activity of the aminoglycoside can occur under these conditions. Tab: S Detailed dosage guidelines and administration information for Augmentin Oral Suspension thus, use of the 125 mg/5 ml, oral suspension is recommended. The presence of clavulanic acid in AMK protects amoxicillin from degradation by  $\beta$ -lactamase enzymes and effectively extends the antibacterial spectrum of amoxicillin to include many bacteria normally resistant to amoxicillin, cephalosporins and other  $\beta$ -lactam antibiotics. a cephalosporin, carbapenem or monobactam) History of jaundice/hepatic impairment due to amoxicillin/clavulanic acid This medicine should not be used if you are allergic to any of its ingredients. It is generally less effective against chromosomally-mediated type 1  $\beta$ -lactamases. You will be redirected to your destination shortly Detailed dosage guidelines and administration information for Augmentin Oral Suspension thus, use of the 125 mg/5 ml, oral suspension is recommended. Cholestatic jaundice, which may be severe, but is usually reversible, has been reported rarely. Back to top Storage Oral preparations should be stored in a dry place at 30°C or below. 5 mg, amoxicillin 228 mg/5 ml, twice daily or Augmentin Amoxicillin Clavulanic acid : Tab/Susp: Short-term treatment of infections eg upper lower resp tract, ENT, skin soft tissue. The following are some of the side effects that are known to be associated with this medicine. Do not give this medicine to other people even if they have the same symptoms you have, as it may not be right for them. Ethanol/ Nutraaceutical/ Herb Not provided information Laboratory Test May interfere with urinary glucose tests using cupric sulfate (Benedict's solution, Clinitest®). Fehling's solution; may inactivate aminoglycosides in vitro. QUALITATIVE AND QUANTITATIVE. Back to top Important safety information Warnings/Precautions Changes in liver function tests have been observed in some patients receiving AMK. Side effects may include: Very common (≥10%) Diarrhea (3%-34%; incidence varies upon dose and regimen used) Common (1%-10%) Dermatologic/skin rash, urticaria. Clavulanate has not been detected in human milk Adverse effects in the nursing infant are unlikely. Reconstituted suspensions should be stored in a refrigerator (2-8°C) and used within 7 days. Prolonged use may also occasionally result in overgrowth of non-susceptible organisms. Back to top How to take medication? The suitable dosage for each patient should be prescribed by a doctor. For more information about any other possible risks associated with this medicine, please read the information provided with the medicine or consult your doctor or pharmacist. 4 mg/kg/day 2-6 years (13-21 kg) 10 ml BID suspension 228 mg/ml, twice daily or 5 ml BID suspension 457 mg/5 ml, twice daily 7-12 years (22-40 kg) 10 ml BID suspension 457 mg/5 ml, twice daily Children 2 months to 2 years: Children <2 years should be dosed according to body weight. In patients with reduced urine output, crystalluria has been observed very rarely, predominantly with parenteral therapy. You will be redirected to your destination shortly. 6/mg/ml Dosage Form: Syrup Route of Administration: Oral Detailed dosage guidelines and administration information for Augmentin Oral Suspension thus, use of the 125 mg/5 ml, oral suspension is recommended. The side effects listed above may not include all of the side effects reported by the medicine's manufacturer. Back to top Contraindications Hypersensitivity to the active substances, to any of the penicillins or to any of the excipients. Amoxicillin is, however, susceptible to degradation by  $\beta$ -lactamases and therefore, the spectrum of activity of amoxicillin alone does not include organisms which produce these  $\beta$ -lactamases. Just because a side effect is stated here, it does not mean that all people using this medicine will experience that or any side effect. SUSPENSION 228 MG/5 ml and 457 MG/5 ml – Mixed fruit flavour QUALITATIVE AND QUANTITATIVE. Children Dosage Recommended Daily Dose: 25/3 6 mg/kg/day in mild to moderate infections (upper respiratory tract infections eg, recurrent otitis/itis, lower respiratory infections and, skin and soft tissue infections); 45/6. Method of Administration: Administration: To minimize the potential gastrointestinal intolerance, administer at the start of a meal. Generic Name: Amoxicillin, Clavulanic Acid Trade Name: Augmentin 228 Mg-5Ml Syrup Strength value: 40, 5. If you feel you have experienced an allergic reaction, stop using this medicine and inform your doctor or pharmacist immediately. The presence of clavulanic acid in Cavumox may cause a nonspecific binding of IgG and albumin by red cell membranes leading to a false-positive Coombs test. Augmentin Amoxicillin Clavulanic acid : Tab/Susp: Short-term treatment of infections eg upper lower resp tract, ENT, skin soft tissue. If the parental administration of high doses is necessary, the sodium content must be taken into account in patients on a sodium restricted diet. There is insufficient experience with Augmentin BID suspension to make dosage recommendations for children <2 months. 1 AUGMENTIN TM Amoxicillin trihydrate – Potassium clavulanate SUSPENSION 228 MG/5 ml and 457 MG/5 ml – Mixed fruit flavour. Clavulanic acid/clavulanate is a  $\beta$ -lactam, structurally related to the penicillins, which possesses the ability to inactivate a wide range of  $\beta$ -lactamase enzymes commonly found in microorganisms resistant to penicillins and cephalosporins. History of a severe immediate hypersensitivity reaction (e.g. anaphylaxis) to another beta-lactam agent (e.g. Amoxicillin-clavulanate should only be given during pregnancy when need has been clearly established. AMK should be avoided if infectious mononucleosis is suspected, since the occurrence of a morbilliform rash has been associated with this condition following the use of amoxicillin. If co-administration is necessary, PT or INR should be carefully monitored with the addition or withdrawal of AMK. Drug Probenecid may result in increased and prolonged blood levels of amoxicillin but not of clavulanic acid. Tab: S Patient Info Pharmacy Library Augmentin-228 Mg Bid Syrup 70 ml 5 ml.; Clavulanate K 28. Convulsions may occur in patients with impaired renal function or in those receiving high doses. Use only for the condition for which it was prescribed Do not give this medicine to other people even if they have the same symptoms you have, as it may not be right for them. Do not take 2 doses at the same time Back to top Pregnancy and breastfeeding Certain medicines should not be used during pregnancy or breastfeeding. Please inform your doctor or pharmacist if you have previously experienced such an allergy. Back to top If you miss a dose Take it as soon as you remember If it is almost time for your next dose, skip the one you missed and go back to your regular schedule. The manufacturer recommends caution when amoxicillin-clavulanate is administered to a nursing woman. Back to top How to take medication? The suitable dosage for each patient should be prescribed by a doctor. BNH Hospital Thailand Augmentin 228 Mg (Bid) Syrup (70 ml) AUGMENTIN TM Amoxicillin trihydrate – Potassium clavulanate. Medicines are sometimes prescribed for purposes other than those listed above Use only for the condition for which it was prescribed. 6/mg/ml Dosage Form: Syrup Route of Administration: Oral Patient Info Pharmacy Library Augmentin-228 Mg Bid Syrup 70 ml 5 ml.; Clavulanate K 28. Reconstitute powder for oral suspension with appropriate amount of water as specified on the bottle. Animal studies failed to reveal any evidence of teratogenicity There are no controlled data in human pregnancies. Patient Info Pharmacy Library Augmentin-228 Mg Bid Syrup 70 ml 5 ml.; Clavulanate K 28. 5 mg, amoxicillin 228 mg/5 ml, twice daily or Detailed dosage guidelines and administration information for Augmentin Oral Suspension thus, use of the 125 mg/5 ml, oral suspension is recommended. Breastfeeding considerations Enter Breast milk/ use caution (APP rates "compatible") Amoxicillin is excreted into human milk in small amounts and is considered compatible with breast-feeding by the American Academy of Pediatrics. 5 Mg 5ml Side Effects Cheap Augmentin Online taking augmentin with milk can you mix alcohol and augmentin augmentin. Generic Name: Amoxicillin, Clavulanic Acid Trade Name: Augmentin 228 Mg-5Ml Syrup Strength value: 40, 5. Concomitant use of allopurinol during treatment with amoxicillin can increase the likelihood of allergic skin reactions. SUSPENSION 228 MG/5 ml and 457 MG/5 ml – Mixed fruit flavour QUALITATIVE AND QUANTITATIVE. Includes dose adjustments, warnings and precautions Augmentin Amoxicillin Clavulanic acid : Tab/Susp: Short-term treatment of infections eg upper lower resp tract, ENT, skin soft tissue. d/006/6244
